Professional Summary

Offensive Security professional specializing in Web, API, and Network Penetration Testing. Experienced with Burp Suite, Nmap, Metasploit, Wireshark, and Python security automation. Creator of VulnX — an AI-powered modular vulnerability scanner. Completed real-world labs including DVWA, Juice Shop, bWAPP, and 30+ TryHackMe rooms.

Core Technical Skills

■ Web Pentesting	Burp Suite, OWASP ZAP, SQLMap, nuclei, ffuf
■ Network Security	Nmap, Nessus, Metasploit, Hydra, Wireshark
■ Red Teaming	Privilege escalation, AD enumeration, exploit chains
■■ Automation	Python scripting, Bash, API testing
■ Operating Systems	Kali Linux, Parrot OS, Ubuntu, Windows Server

Projects

■ VulnX Scanner (AI-Integrated Modular Scanner)

- Python-based scanner detecting headers, injections, file inclusion, WAF weakness.
- AI-assisted mitigation engine for instant remediation steps.

■ Web Pentesting Labs – DVWA, Juice Shop, bWAPP

- Performed SQLi, XSS, CSRF, IDOR, logic flaw exploitation.
- Created structured VAPT reports.

■ API Penetration Testing

- Identified BOLA, IDOR, rate limiting & authentication flaws.

■ TryHackMe Labs

- Completed OWASP Top 10, Network Security, Red Team fundamentals.

Experience

PwC Cybersecurity Virtual Internship (2025)

- Conducted threat analysis & simulated incident response.
- Performed vulnerability assessments aligning with NIST.
- Prepared professional cybersecurity reports.

Education

B.Sc. Cyber and Digital Science

Suryadatta College of Management Information Research & Technology, Pune
SPPU (2022–2025) | CGPA: 8.1 Overall | 8.9 Final Year

Certifications

- Cisco Certified Ethical Hacker (Cisco Networking Academy)
- TryHackMe Learning Path Achievements
