PROFESSIONAL SUMMARY

Offensive Security practitioner specializing in Web, API, and Network Penetration Testing. Experienced in vulnerability assessment, red-team enumeration, and reconnaissance automation. Developer of ReconX, a CLI-based automation tool for security reconnaissance, with applied knowledge of OWASP Top 10 and exploitation workflows through 30+ practical labs.

EDUCATION

M.Sc. PGD in Cyber & Computer Forensics and Related Law 2025 – 2026
Government Institute of Forensic Science, Aurangabad

B.Sc. in Cyber and Digital Science 2022 – 2025
Suryadatta College of Management Information Research & Technology, Pune
CGPA: 8.1 Overall — 8.9 Final Year

TECHNICAL SKILLS

- **Web & API Security:** Burp Suite, OWASP ZAP, SQLMap, ffuf, gobuster, nuclei, BOLA, IDOR.
- **Network Security:** Nmap, Nessus, Metasploit, Hydra, Wireshark, SSH/FTP enumeration.
- **Red Teaming:** Privilege escalation (Linux/Windows), AD enumeration, exploit chain building, OSINT.
- **Automation & OS:** Python, Bash (Recon automation), Kali Linux, Parrot OS, Ubuntu.
- **Compliance:** ISO 27001, NIST, GDPR.

PROJECTS

ReconX (Reconnaissance Automation Tool)

- Developed a CLI-based tool in Python/Bash designed to automate initial reconnaissance and information gathering.
- Currently in early-stage development, focusing on modular script integration for rapid target enumeration.

Security Labs & Penetration Testing

- **Web Pentesting:** Executed SQLi, XSS, CSRF, IDOR, and logic flaw exploitations on DVWA, Juice Shop, and bWAPP.
- **API Testing:** Identified BOLA, IDOR, and rate limiting flaws in dedicated API security environments.
- **TryHackMe:** Completed Learning Paths in Network Security and Red Team rooms.

CERTIFICATIONS

- Cisco Certified Ethical Hacking Explorer (Cisco Networking Academy)
- TryHackMe Learning Path Achievements
